

LANDING PAGE

THEME:

The theme of this landing page is to advertise a free online CAD course among the people.

MOTIVATION:

"My favourite course was CAD"

- In my first semester, I had a course called MEE and I learnt CAD under this course. I used AUTOCAD software to draw designs. That turned out to be my favourite course in that semester.
- So, as soon as I heard about the task the concept of making a landing page for CAD course came into my mind and that stood as a main motivation to create a landing page for CAD course.

FUTURE IMPROVEMENTS:

*This advertisement is for a course that covers CAD basics.Steps will be taken to upload a bunch of new videos according to the difficulty level.

*Steps will be taken to provide certificates to students who completes each level of course.

*Steps will be taken for arranging interactive meeting sessions between beginners and students who completed more than half of the course.

*The process of providing subtitles will be taken care of.

*Classes will be taken by the top professors in the country.

*Steps will be taken to provide videos in their native language so that it will be more easy for the students.

*After the student completes the entire course a session will organised to guide them for future steps.

MY LANDING PAGE:

- This is my landing page

MY LANDING PAGE

Decide what you want, and then act as if it were impossible to fail.
